DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 5 -12, 27 and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In order to insure that the inventive structure is clearly defined, the claims must specifically describe the relationship between the work function of the individual layers in relation to the overall, or effective, work function of the gate electrode.

That is, while claims 1, 27 and 29 describe the work function of the individual metal layers, it is important to define these properties with respect to the net work function exhibited by the gate electrode, for the device as a whole. In effect, the claims describe a situation where an individual metal layer has a work function that is exclusively responsive to itself.

In addition, the language of claims 1, 27 and 29 where a "second" metal gate electrode is described is vague in that no "first" gate electrode has been recited.
